

## Project Design Phase-1

### Solution Architecture

<b>Date</b>	19 September 2022
<b>Team ID</b>	PNT2022TMID41335
<b>Project Name</b>	IoT Based Safety Gadget for Child Safety Monitoring & Notification
<b>Maximum Marks</b>	4 Marks

### Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- ☒ Find the best tech solution to solve existing business problems.
- ☒ Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- ☒ Define features, development phases, and solution requirements.
- ☒ Provide specifications according to which the solution is defined, managed and delivered.
